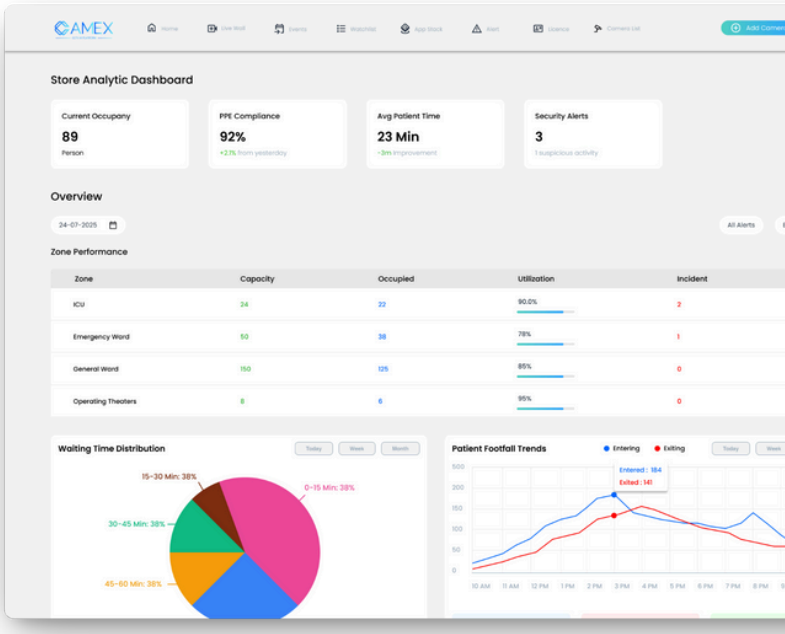
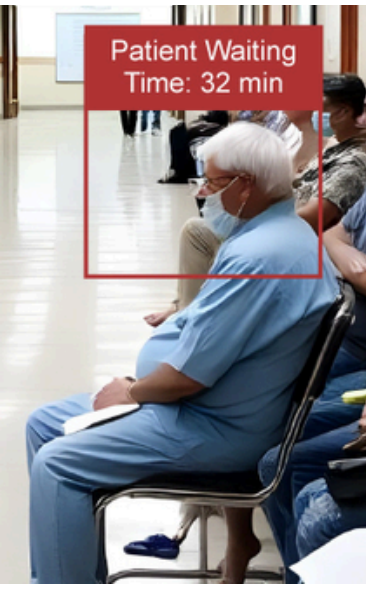
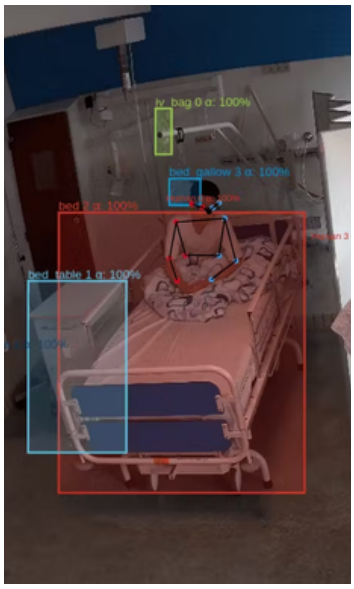
DEZZEX

Upgrade Your Hospital CCTV to Smart Insights with Camex







Problem Statement

- Limited visibility into patient flow, staff movement, and no real-time alerts.
- Manual monitoring delays detection of unusual patterns, overcrowding, or lapses in timely care.

Solution

- AI-powered CCTV boosts patient safety, staff efficiency, and operational visibility.
- Early anomaly detection and automated surveillance reduce manual effort and enhance response time.

Key Features of Our AI Solution

Real-Time Video Analytics

Track patient wait times, staff movement patterns, and zone occupancy through smart visual data.

Instant Alerts

alerts for ER crowding, restricted access breaches, and critical care patient movement.

Multi-Zone Comparison

Compare activity levels across departments like OPD, ICU, ER, and pharmacies to optimize resource allocation.

Smart Reports

Automatically generate operational reports daily, weekly, or monthly in Excel or PDF format

Seamless Integration

Works with your existing hospital CCTV setup — no need for new hardware or wiring.
