

WHAT'S HAPPENING INSIDE YOUR WAREHOUSE RIGHT NOW?

Track storage flow, loading speed, and real-time shift performance with Warehouse Analytics — boosting daily efficiency, reducing idle time, and increasing throughput across every stage.

Introducing CAMEX Your Ultimate AI Solution

What Solution We Offer

- 
Worker Monitor
Track active staff, productivity & idle time in real time
- 
Staff Insights
Get instant visibility on attendance & performance
- 
Zone Monitor
Compare zone performance and optimize floor operations
- 
PPE Detection
Ensure safety compliance with AI alerts
- 
Warehouse Monitor
Analyze loading, box filling, and shift productivity
- 
QC Check
Detect process errors & automate quality validation

Result

Smarter operations. Safer workspace. Stronger performance.

Camex helps businesses see, analyze, and act — instantly.

Problem

Manual monitoring across shop floors, warehouses, and QA stations leads to :

- Missed safety compliance
- Inefficient staff tracking
- Time loss in manual QA checks
- No clear productivity insights

Our Solution

Camex AI Dashboard turns CCTV footage into real-time analytics that improve efficiency, safety, and quality — all in one view.

Why It Matters

- Reduce downtime & manual supervision
- Ensure 100% PPE compliance
- Real-time alerts for faster action
- Date-wise analytics (daily, weekly, monthly)
- Improve overall operational efficiency
